

Interior Design website Style Guide

Typography and font details

I have chosen two fonts for this website which are as follows:

1. Srisakdi, cursive.
2. Roboto, san-serif.

I chose the above fonts to give a easy to read and matching/creative look to website. I choose Srisakdi as a contrasting font which gives good and catchy looks to tagline. For headings I have used Roboto Black to emphasize bit more, and Roboto medium as a general text font.

I have also modified H2 tag and for hover I changed it from Roboto-medium to Roboto-black, which makes currently focused element look bit different.

media screen and (max-width: 768px): h1=24px and h2=18px.

media screen and (max-width: 1200px): h1=30px and h2=20px.

Roboto regular	Sans-Serif:	Nav Menu
Srisakdi, cursive, Font size (48px) (available on Google fonts)		H1 text Lead Your Life In Your On Style
Roboto Regular On hover: Roboto black		cardcardcard
Roboto regular		Footer Section
